Course Overview

The Scrum Master course is designed to equip persons of all experience levels with hands on experience in the field of Agile Scrum.

An in depth face to face or virtual coaching session

Our intensive training programme provides you with a transformative learning experience. Whether in-person or virtual, our expert tutors will guide you through an immersive two (2) day session focused on the core principles that underpins Agile Scrum. This will be followed by a three (3) month live project. The 2 day session is designed to provide you with a solid foundation, ensuring you grasp the essential concepts of Agile Scrum delivery framework.

LEARN
THROUGH
PRACTICE

Real world application on a 2 month live project

Our teaching and learning style goes beyond theory. With an understanding of the core principles, we provide you the opportunity to test and apply the skills acquired in hands-on exercises rooted in real life projects.

In a two (2) month period, you will work on applying the skills and principles you have acquired as a Scrum Master in a team as you would in an organisation. This practical experience is invaluable. It does not only enhances your understanding of the subject matter but builds up your skills to thrive in a dynamic and fast paced IT environment.

Dedicated support

Our commitment to your success extends beyond the training. We offer you unwavering support at every phase of your journey. We provide you with support services including CV review and advice, job application assistance and interview preparation support.

Once you secure a role, you will benefit from the guidance of a dedicated mentor who will support you in navigating the challenges and opportunities of your new role.

EXPERT SUPPORT AT EVERY STAGE
OF YOUR JOURNEY

- **CV review:** Craft a compelling curriculum vitae (CV) with the help of our experienced team. We ensure your CV projects your Scrum Master skills, making you stand out in a competitive job market.
- **Interview preparation:** Ace your job interviews with our specialized guidance. We will take you through mock interview sessions, providing insights and tips to enhance not only your performance but your confidence as well.
- **Mentorship:** We offer a dynamic mentoring experience both during and after your training. Our seasoned professionals guide you through shaping your career, provide industry insights and expertise, address any challenges along the way, etc.
- **Post training support:** Our support does not end with the course. You will have the benefit of a network of professionals which will offer you the needed support to transition from training to your new career.
